## Why Electric Light Bills Are Higher in December than in

People use electric light nearly three times as long in December as they do in June

This chart divides the 24 hours of a day into three periods the period of sleep, the period of using electric light and the period of daylight.

In June the average use of electric light in residences is 2 55-100 hours per day.

In December the average use of electric light in residences is 6 85-100 hours per day.

Therefore, the average use of electric light in the home is nearly three times as great in December as in June.

His paper in part follows: We wish, also, to extend to the press past has been determined, largely by the character of the civilization

Today, we are living in the whirt of a striving, hurrying, complex civilization, with such varying demands upon the course of study, that the mind becomes bewildered.

The school room is the happy hunting ground for faddists and reformers. In the game of life faddists have heir function, and reformers we must have, but from the profusion of ideas. This instruction must spring sponsed by their systems, from Comenius to Montessori, we must be gelective, er keeping in mind the real needs f the child as determined by the naof the child.

ture of the child.

But the field of knowledge is large, and the time of life is short; hence that which is of greatest value, should receive greatest attention.

In forming courses of study we are casy imitators. As Herbert Spencer once said: "We dress our children's minds as we do their bodies, according to the prevailing fashion."

While the truth of this statement may be less apparent today than it was when written, set it is up to ed-

was when written, set it is up to educators to be sure of their footing that they may not yield too much to

proves that the self seeks expression through the physical, the intellectual and the moral life. Nothing short of development in all of these phases of life can produce the complete man fitted to become the efficient citizen. We are taught that mind manifesh iself through the nervous system, and that a strong pervous system is the

result of a healthy body. Therefore the school instead of permitting on tions that tend to produce defective positive means for securing the healt and physical devalopment of th This end should be sought through the proper sanitary construction technol buildings, with favorable environment as to draining, suningly

grounds, and school gardens. Recreation, play, cleanliness of the body, food, clothing, effects of alcoholand parcotics upon the undeveloped hody, the symptoms of disease, and the effects of ancontrolled emotions upon the health, should all receive intelligent attention; and a careful habits which help and those

which hinder health. As to the intellectual training in entest is strong for many and var

use. He should have encouragement and director in the development of a hand writing which could be read, even after the letters become cold. He should have a knowledge of practical physiology, and of dynamic geography and history. He should have his powers of observation, and his empathics cultivated through nature study and the test increasure

ture study and the best literature suited to his age. He should have his yes opened to what the world is do no through lesions on current events the should have the refining influence which may some from music and from art. All these phases of cultur should be his, that he may be little for a richer enjoyment of life. To reach these ends and to at the dangers of statiowness and or crowding let us eliminate the less permet things to be found in the merse of study, making a distinct as some one says, "between first ra and tenth rate facts and principles Then let us study the needs of e-child, seek a closer correlation studies and do more things attract and well; even thought the cara' course may be reduced to six

There is at present sweeping o the land a great industrial wave which is changing the elementary that the course of study should endjusted, from time to time Everything in totlet articles at the its keep in mind the chief aim of education and quard well the fundamental principles.
